AGR / Agrumes. Bergamot grapefruit and lemon guiding the senses towards vetiver and cedar

BDC / Bois De Cèdre. A relaxing blend of cedar wood patchouli and sandalwood

COR / Coriandre. With its spicy freshness this fragrance takes you on a trip from Asia to the Mediterrean

TVE / Thé Vert. A lemon fragrance with a natural feeling, slightly aromatised with mint and eucalyptus

SYMBOLS

LEARN MORE ABOUT OUR ESSENTIALS. SYMBOLS; WHAT DO THEY MEAN? THE SYMBOLS IN OUR CATALOGUE PROVIDE SPECIFIC INFORMATION TO HELP YOU FIND THE QUALITY THAT YOU ARE LOOKING FOR.

BATH MAT SPECIFICATIONS

These symbols indicate extra information about the bath rug in its whole and the pile of the mat.

This symbol represents the pile of the bath mat. (height and weight) whole and the pile of the mat.

This symbol represents the bath mat in its whole. (height and weight) whole and the pile of the mat.

BATH MAT SPECIFICATIONS

We determined the following symbols to give an indication of the anti-slip level of our bath mats. Please keep in mind this is just an indication. The effectiveness of the anti-slip backing also depends on the type of floor. Regarding the given information, we decline all responsibility for any damage or accidents.

LIGHT ANTI-SLIP - CLEAR SILICON DOTS BACKING
The silicon dots provide anti-slip properties. The backing is wash and UV resistant.

REGULAR ANTI-SLIP - LATEX SPRAY BACKING
The latex spray provides anti-slip properties. The backing is wash resistant.

MEDIUM ANTI-SLIP - (DOUBLE LAYER) LICK ROLL SYNTHETIC LATEX BACKING
The lick roll latex provides anti-slip properties and loop/pile adhesion. The backing is wash and UV resistant.

PREMIUM ANTI-SLIP - EMBOSSED (BASKET STRUCTURE) NATURAL AND SYNTHETIC LATEX BACKING
The embossed latex provides anti-slip properties, loop/pile adhesion and stability. The backing is wash resistant, remains flexible and is durable.

COTTON

The following symbols provide extra information about the type of cotton of our textiles.

ORGANIC COTTON is grown in subtropical countries, using methods and materials that have a low impact on the environment. Grown from non genetically modified plants, without the use of any synthetic agricultural chemicals such as fertilizers or pesticides. Its production also promotes and enhances biodiversity and biological cycles.

EGYPTIAN COTTON is an incredibly soft combed cotton, developed especially for the manufacture of luxurious textiles. This voluminous strong and long staple yarn ensures an extraordinary absorption and a long lasting enjoyment.

GLOBAL TEXTILE CERTIFIED **ORGANIC STANDARD**
This standard stipulates requirements throughout the supply chain for both ecology and labour conditions in textile and apparel manufacturing using organically produced raw materials.

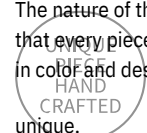

Organic Certified by Control Union CU 1005907

UNIQUE PIECE - HANDCRAFTED

Many of our products are handcrafted and are an example of true craftsmanship.

The nature of this production process means that every piece is slightly different. Variations in color and design can occur, this adds to the overall charm of our products and it makes them unique.

MUST BE WASHED IN A WASHING BAG

Many of our products are handcrafted and are an example of true craftsmanship.

This symbol specifies which bath mats must be washed inside a washing bag to avoid damage of the pile. In order to maintain the quality and the looks of our bath mats, we recommend to wash them according to the care instructions and inside a Lavia washing bag.

WASHING INSTRUCTIONS

TAKE CARE OF YOUR ESSENTIALS. SYMBOLS; WHAT DO THEY MEAN? THE CARE LABELS IN OUR BATH TEXTILES GIVE YOU SPECIAL INSTRUCTIONS TO HELP YOU KEEP YOUR AQUANOVA PRODUCTS LOOKING THEIR BEST.

WASH

The following wash care symbols deal with how your product should be cleaned.

Maximum wash (no bar)
The number within the washtub is the maximum wash temperature.

Medium wash (one bar)
Delicate washing conditions.

Minimum wash (two bars)
Delicate washing conditions.

Hand wash only
Do not machine wash. Wash by hand, maximum temperature 40°C, handle with care.

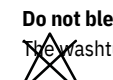

Not suitable for washing

BLEACH

Most of the Aquanova products are not suitable for bleaching. Therefore you will find the care symbol below on most of our labels.

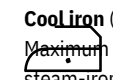

Do not bleach
The washtub is the maximum wash temperature.

IRON

Once your products are dry, ironing could be necessary. These care symbols explain how your textiles should be ironed.

Cool iron (one dot)
Maximum sole-plate temperature of 110°C
Steam-ironing may be a risk.

Medium iron (two dots)
Maximum sole-plate temperature of 150°C.

Hot iron (three dots)
Maximum sole-plate temperature of 200°C.

Do not iron
Steaming and steam treatments are not allowed

HEATING

Suitable for underfloor heating
Our bath mats which carry a symbol as shown below are suitable for underfloor heating.

WE'VE PUT TOGETHER A GUIDE FOR YOU TO SEE WHAT ALL THE CARE LABELS REPRESENT. THIS GUIDE EXPLAINS THE SYMBOLS ON YOUR LABELS CONCERNING HOW TO WASH, DRY AND IRON YOUR BATH TEXTILES.

TUMBLE DRY

Once the washing is done, it's just as important to dry your Aquanova product properly. The following wash care symbols explain whether it's safe to use a tumble dryer after washing and if so, which setting is acceptable.

May be tumble dried

Tumble dry low (low heat setting)

Tumble dry normal (normal heat setting)

Do not tumble dry

NATURAL DRYING

In some cases, it's desirable to dry your bath mat naturally. The following care symbols explain the best method to use in order to avoid damaging your product.

Dry flat
Recommended for bath textiles which are easily distorted by vertical hanging.

Hang / Line dry
For textiles which are not distorted by vertical drying or where tumble drying is not recommended.

Drip dry
Recommended for textiles which will withstand distortion and are generally synthetic in nature.

DRY CLEANING

Although we strive to develop products that can be washed at home, some products may be taken care of by a professional. These symbols concern whether your bath textiles should be dry cleaned.

May be dry cleaned

May be dry cleaned
Suitable for dry cleaning using all solvents. (the letter tells the dry cleaner what process is required)

Do not dry clean or remove stains with solvents

FREQUENTLY ASKED QUESTIONS

GENERAL

Are your products sustainable?

Our ambition is to make greener choices every day. The result of this can already be found in a few products. Think of the ‘Global Organic Textile Standard’ label of the Oslo and Per series, the Dix and Sawa baskets made from Bamboo and recycled PET, Jura bath mats made from recycled PET or our other series made from natural materials.

TEXTILE

How do I wash my towels?

The majority of our towels can be washed at 60°. Do you prefer to wash them at 40°? No problem! This way your towels will last even longer and its more environmentally friendly! Ironing and drying instructions vary from product to product. That’s why you should look carefully at the instructions for your product on the care label. It’s best not to let wet textiles dry in the sun. This can cause the colors to fade.

How do I wash my bath mat?

It is important that you put the bath mat in a washing bag. This will protect the bath mat from friction in the drum and keep the mat maintain its look. The bag also catches fluff, so nothing remains in the machine. After washing, you can easily dispose the dirt in the bin. Not every product has the same maintenance instructions. Therefore, look carefully at the instructions of your product on the washing label.

Do not hang your bath mat to dry vertically. This may cause it to deform. Place it rather horizontally on a drying rack. Wet textiles should not be left to dry in the sun. This may cause the colors to fade It is advisable to wash the Bath mats as little as possible. Most mats are so large that they absorb a lot of water in the washing machine. The mat becomes heavy and dries slowly. If you don’t stand on the mat with your shoes on, regular washing may be unnecessary.

My bath mat absorbs little water

Chances are that your mat consists of synthetic material. This has a lower absorption capacity than a natural fabric such as cotton. Part of the water remains on the surface, which means it dries faster than natural fabric. It depends on what you find more pleasant.

My bath mat dries slowly

Chances are that your mat consists of a natural material such as cotton. This has a higher absorption capacity than a synthetic fabric. It takes longer for the mat to dry, but your feet remain drier as the water won’t lay on the surface. It depends on what you find more pleasant.

Are the anti-slip backings suitable for underfloor heating?

Yes they are! All of our bath mats are suitable for underfloor heating.

How do I wash my bathrobe?

Not every product has the same care instructions. Look carefully at the instructions of your product on the care label. Wet textiles should not be allowed to dry in the sun. This can cause the colors to fade.

ACCESSORIES

The pump of my soap dispenser is rusty / soap discolors.

This is not pleasant of course! A possible cause is the pH value of your soap. Stainless steel contains a protective layer. If the pH value is not neutral (7) or the soap is not natural, it can penetrate this layer. Very strong acids (very low pH) and very strong alkalines (very high pH) are extremely corrosive and burn holes through different materials.

Although stainless steel is made to be more resistant to acids, it is less resistant to alkaline substances. In most cases, soap is an alkaline substance. This allows the soap to react with the pump and discolor. It is strongly recommended to choose a pH-neutral soap. This is not only better for the material, but also much healthier for your skin. And that is of course the most important thing.

! Important: in order to maintain the pump, it is best to rinse regularly by pumping in lukewarm water. This way you can prevent the soap from penetrating the protective layer in the long run and rinse away any leftovers immediately. !

The pump is not working as it should. How do I fix this?

If the soap comes out of the pump with difficulty, the pump may be clogged. This can happen when your soap dispenser is not used daily. Solution: in order to maintain the pump, it is best to rinse it regularly by pumping it in lukewarm water. This way you can prevent the soap from penetrating the protective layer in the long run and rinse away any remaining residue.

Leftovers in the pump can also result in soap coming out too quickly. The pressure builds up and pushes the soap out at a higher speed. Another possibility is the fluidity in the soap. A watery soap comes out much faster than a thicker soap.

Can the accessories be put in the dishwasher?

Most of our accessories are not dishwasher proof. Some materials would be able to withstand this, but this does not apply to the anti-slip on the bottom. Therefore, we recommend not putting any Aquanova

accessories in the dishwasher just to be on the safe side. Rinsing by hand in lukewarm water is possible. Clean the pump regularly by pumping it several times in lukewarm water. Then dry the material thoroughly.

How do I maintain the material?

Although the products are suitable for the bathroom, they are not meant to be moist for a longer period of time. In very humid, small rooms, it is recommended to dry the products regularly. Constant exposure to moisture can damage the product. We highly recommend to clean your accessories weekly with a soft damp cloth.

BASKETS

Can I wash my laundry and storage baskets?

Read the washing instructions on the label on the inside. Preferably wash the baskets in a laundry bag. Does the product not carry a washing label? Then it is not suitable for washing. It is best not to let wet textiles dry in the sun. This may cause the colors to fade.

My laundry basket does not stay upright. How do I solve this?

Laundry baskets with a thinner fabric often loose shape when they aren’t filled with laundry. Steaming may help to maintain the shape. Push the basket into the desired shape by hand. Steam the basket to fix the shape as best as possible. Avoid direct contact between the material and the steamer.

ORGANIZERS

How do I maintain my wood products?

Most types of wood shrink or expand in cold or warm temperatures. This does not affect the quality. The wooden bath mats are not suitable for use in the shower. In very humid, small rooms, it is recommended to dry the products regularly. The wood has been given the necessary treatments, but constant exposure to moisture can damage the varnish in the long term. Do not let the product dry in the sun. This may cause it to fade.

How do I take care of my steel products?

The steel products require little or no maintenance. In very humid, small spaces it is recommended to dry the products regularly. Constant exposure to moisture can damage the product.
